To Whom It May Concern,

I highly recommend Louis Rosche for roles in education and talent development. I enjoyed working with him as his evaluator and administrator for over two years. I have found his approach to students and pedagogy incredibly thoughtful, introspective, and creative. He is a progressive and pragmatic thinker willing to do anything to solve a problem that benefits students.

I first supervised Mr. Rosche as a fifth and sixth-grade teacher. He successfully built strong relationships with his students, which led to equally strong academic gains in his class. Last year, his students were among the top performers on our State assessment building-wide. Mr. Rosche's innovative and progressive methods in his classroom genuinely allow students to take ownership of their learning while building self-confidence and resiliency for tackling grade-level subject material.

Our school is 100% free and reduced lunch eligible with 40% non-English homes. Louis has developed an outstanding rapport with families in every socioeconomic group he works with. He has even contacted students in other classes as a support and role model. He is truly an asset to our staff in every regard.

Mr. Rosche's family is close to ours, and we believe his broad range of experiences and interests have compelled and empowered his growth beyond being an effective classroom teacher. I know he can learn and teach any discipline. He would work to accomplish excellence, even in areas he was not yet proficient.

Please contact me with any questions.

Respectfully,
Arnie Lewis
